

This map of Japan displays the locations of 100 volcanoes, marked with red triangles and labeled. The map includes latitude and longitude coordinates, with latitude ranging from 24N to 44N and longitude from 124E to 148E. The volcanoes are distributed across the four main islands of Japan: Hokkaido, Honshu, Shikoku, and Kyushu. Major volcanic arcs are visible, particularly along the Pacific coast of Honshu and the Ryukyu Islands. The map also shows the surrounding ocean and the Korean Peninsula to the west.
